

# CHONCHANOK CHANTAWIJIT

## PETROLEUM TECHNOLOGY

Chana, Songkhla, Thailand | chonchanok1001@gmail.com | 062-732-4159

A highly motivated Technology graduate transitioning into UX/UI Design, with hands-on experience developing an LMS website prototype using Visual Studio Code as a capstone project. This background provided a strong foundation in gathering user requirements and system architecture. A fast learner eager to embrace new challenges, ready to combine technical logic with user-centric thinking as a Junior UX/UI Designer. Available immediately.

### EDUCATION

| University  |                                                                                                |                   |
|-------------|------------------------------------------------------------------------------------------------|-------------------|
| 2024 - 2025 | Rajamangala University of Technology Srivijaya                                                 | GPA : <b>3.45</b> |

| 2026 | <b>Prototype Development of an Online Learning System for Offshore Aviation Personnel</b>                                                                                                                                                                                                                                                                                                                                                    |
|      | <ul style="list-style-type: none"><li>Designed and developed an LMS website prototype using VS Code, Gemini AI, Google Apps Script, Sheets, and Drive; successfully selected as a faculty representative for a university innovation competition.</li><li>Created tracking functions for training status and certificate expirations, helping the company eliminate scheduling conflicts and prevent operational equipment damage.</li></ul> |
| 2025 | <b>Biodiesel Production from Used Vegetable Oil Using Hydrochar from MDF as Catalyst Support</b>                                                                                                                                                                                                                                                                                                                                             |
|      | <ul style="list-style-type: none"><li>Conducted practical laboratory experiments to produce biodiesel by synthesizing custom catalyst supports, strictly maintaining 100% compliance with chemical safety protocols.</li><li>Utilized advanced lab equipment and analyzed research literature to troubleshoot errors, discovering data-driven methods to successfully optimize chemical reaction performance.</li></ul>                      |
| 2023 | <b>Process simulation of poly lactic acid production</b>                                                                                                                                                                                                                                                                                                                                                                                     |
|      | <ul style="list-style-type: none"><li>Constructed a chemical process simulation to convert cassava into bio-plastic (PLA) using Aspen Plus, optimizing parameters to maximize product yield.</li><li>Evaluated ideal operating conditions via software simulation, providing a cost-effective, zero-risk predictive model before transitioning to actual physical production.</li></ul>                                                      |

### HARD SKILLS

- UX/UI Design & Architecture
- AI-Driven UI Prototyping
- Wireframing & Mockup Design
- User Research & Persona Creation
- Data Visualization
- Graphic & Branding Design

### SOFT SKILLS

- Empathy & User-Centric Thinking
- Logical Problem-Solving
- Teamwork & Collaboration
- Cross-Functional Communication
- Adaptability & Fast Learning

### DIGITAL SKILLS

- Figma (AI Features & Prompting)
- Canva (Expert)
- Microsoft PowerPoint (Proficient)
- Microsoft Word (Proficient)
- Microsoft Excel (Proficient)

### LANGUAGE

Thai

Native

English
